

May 6, 1975

a fine program I assume. The number one priority programs under that certainly would have been different in aging, if I had to choose, of transportation, meals program . . . which are now starting to come there. How do we get a handle on that because we have made a commitment of state funds, as I recall of 75 percent of all funds? How do we help establish those programs? How do we see that they're carried out?

SENATOR MARVEL: What you have, and what we've tried to do throughout this bill which at times may be even more important than the money involved, is when you appropriate you also say we want a plan. We don't want . . . this just isn't a gimic. We want to know what you propose to do with the money that's appropriated and the intent that's given by the Legislature. We want to know what you're going to do for five years. We want to know specifically what you're going to do for one year. Now may I refer you for a moment in 605 to page 18. Page 18 says that . . . without trying to read it all here. Page 18 says "the department shall submit a specific state plan for cooperative development and delivery of social services at the local level in conjunction with", then it lists the various departments, "Health, Commission on Aging, Department of Public Institutions". Not only are we talking about a specific plan for the department, but that plan includes cooperation between other departments. We've got too much over . . . this is part of what I think you mean. We've got too much overlapping of functions in this state. We've got too many people trying to do the same thing. The only way I know to go at it is to use this as a tool and encourage legislators to take this language and followup on it. This has the full force and effect of law. That's what this is, the law.

SENATOR F. LEWIS: Let me ask a few more questions. I'll try to hurry. Now in Program 365, on mental health by regions. I notice that in region 6 that the request level is down . . . well I can't find my recommendation here yet. I see where you've appropriated \$789,000. According to my notes that was substantially less than the recommendation of the Governor. Anyway I'll try to get back to that question in a minute. There is a substantial reduction there. I understand Senator Goodrich is going to address that, so I'm going to move on so I won't take up any more time. On page 13 "the Office of Mental Retardation shall, in cooperation with other state or local agencies, conduct annual evaluations of the programs and support services, including administration provided by mental retardation regions". Now that's what the Tews-Ross Study did, wasn't it? Now have you tried to implement some of the recommendations and some of the information from the Tews-Ross Study?

SENATOR MARVEL: Not yet. We were given a short briefing by the people who conducted the study. It's my understanding that the Advisory Committee to the Department of Institutions and Welfare, under the guidance of John Humple who is I understand instrumental in bringing the Tews-Ross
